Starting as a Subject

Being a hypnotic subject is easy on Yuuk.space! The first step is to find a project that contains themes you're interested in. A creator may send you a link to a project they've marked as private, or you can use one of the various publicly-available projects.

Public Projects can be found in one of two places:

1. Dashboard - The page that you'll find yourself on immediately after logging in, the Dashboard contains a list of all publicly available projects. Next to each project title, you can find a number that indicates how many sessions the project contains. Beneath the project title you'll find a list of themes that sessions within the project will focus on, as well as a link to the creator's User Profile. Simply select one to view the sessions contained within, or click on the creator's @ to view their profile and see all publicly available projects they've created.
2. Search... - The Search... bar at the top of each page of the site is perhaps the fastest way to find a project if you already know what you're looking for. Enter in the desired character string, 'Toy' for example, and you'll immediately receive a filtered, scrollable list of each public project containing that string. Select one to reach the project's contents.

Once a project has been selected or you've followed a link provided to you, you'll find yourself on the Project Details page. This lists out the available sessions the project has for you to engage with.

Select the session you wish to begin, view the transparency report (the ? icon next to the 'Launch Session' button) if you'd like to know what you're getting into ahead of time, click the 'Launch Session' button, and enjoy!

For information on more advanced session use, please see the Playlists page.
