Found by clicking on a user's @ link, the user profile page contains all the information that the user has configured to be visible to other users. This page consists of the following elements:

User Profile Page - This frame contains the user's profile information. This includes their username, the amount of projects and sessions they've created, and their profile description. If the option to display them publicly has been enabled by the user, their contact email and interests can be found in the upper-right and lower sections of the frame, respectively.
