Welcome

Welcome! This guide is here to help introduce and expand on the features of the various tools available on this website. If you find any typos, broken links, or incorrect information within the ensuing documentation, please feel free to use the Feedback option on the main site.

If you're new to the website in general, it's recommended to check out the description of the site at What is Hypna.space and/or the Getting Started guide at Getting Started on Hypna.space.

Otherwise, you can use the Shelves or Books links - or the Search bar at the top of the page - to find and navigate to the desired page.

Please note that while the desktop and mobile versions of this site are largely the same, this guide was created primarily using the desktop version. Notations are made where the site has significant differences on mobile, but if you find a section that you feel requires greater clarification between the two platforms, please bring it up via the Feedback page.

What is Yuuk.space

Simply put, Yuuk.space is a collection of hypnosis tools primarily intended to be used for self-hypnosis purposes. On it you can find a variety of projects created by the website's userbase, as well as tools for making your own projects. Projects contain individual sessions, each of which the user is intended to watch, follow along with, and/or complete before moving forward to the next.

For an introduction on navigating the site and using it, please continue on to Getting Started on Yuuk.space.

Getting Started on Yuuk.space

If you're new to Yuuk.space and looking for somewhere to start, you're in the right place! First thing's first: Are you interested in creating a project of your own, or in being a subject for one of the various projects available on the site?
